Page 1

Constructed in 1944, this building sits north of B Street (old A Street) behind building 2635. It is of "Mobilization," "Semi-Permanent" construction, contains 4,500 square feet and was built for \$8,000.

The building has a concrete block pier foundation and a wood frame superstructure. It is clad in horizontal wood siding and has a gabled roof covered with composition shingles. The many windows are 8/8 units. There are three attic vents on the roof.

The interior has a central corridor running the entire 150 foot length of the building. There are 30, small interior rooms, divided roughly equally on both sides of the corridor. The building is 29 feet-6 inches in width. The building's broadsides face north and south. This long, one-story building appears to be in good condition.
